

Google/Slack Integration Testing

Project Title	Google/Slack Integration Testing
Project Summary	Perform Google/Slack integration testing on a beta platform w/ test accounts to assess the application risk levels and provide a report to IIP/POG. The generated report will be used as part of the considerations for acceptance or rejection of a software or web browser integration request.
Country	United States
Agency	Department of State
DoS Office	IIP/POG
Post	N/A
Section	N/A
Number of Interns	3

Project Description

Moving forward with the local CAB, IIP/POG will send the interns a list of risky scopes and have them research each integration. The research and reporting will give some contextual background and make decisions easier. [Three students selected: Taylor Brown, Zoe Zwarzenski, and Eryn Newcomb.]

Desired Skills Interests

Skill

Research capability for determining risk

capability for assessing the findings and providing recommendations

ability to compile comprehensive reports and summary of reasons and logic

Additional Information

Research capability for determining risk, assessing the findings and providing recommendations to move forward on a software integration request. Ability to compile comprehensive reports with details of research findings, testing of integration, and summary of reasons and logic on why a specific software or web browser integration should be accepted or rejected.

Language Requirements

None
